

Where the expanded oracles changed the answer

48 fresh, unrepaired generations · 3 model configurations · 2 calls per model-task cell.

functional pass + oracle pass gap member functional pass + indeterminate functional nonpass each block = 1 candidate

Stream hold	protocol							2 / 4	gaps / determinate functional passes
								1 functional nonpass	
Result hold	protocol							3 / 5	gaps / determinate functional passes
								1 functional nonpass	
Command deadline	temporal							2 / 4	gaps / determinate functional passes
								2 functional nonpass	
Grant deadline	temporal							4 / 6	gaps / determinate functional passes
IRQ pulse	temporal							0 / 6	gaps / determinate functional passes
Completion pulse	temporal							0 / 3	gaps / determinate functional passes
								3 functional nonpass	
Opcode unit	equivalence							0 / 6	gaps / determinate functional passes
Signed clamp	equivalence							0 / 6	gaps / determinate functional passes

Overall: 11 / 40 = 27.5%

All 11 gap members had Verilator lint status pass; equivalence was a 0 / 12 bounded null.
